

GRANT DETECTION

Our commitment to inclusion of people with disabilities

Grant Detection announces its commitment to the inclusion of people with disabilities. At Grant Detection, we believe that diversity, equality and inclusion (DEI) are essential to the development of our company. We recognize that there are systemic barriers to equality and we want to play our part by acting with purpose and working towards meaningful change.

Our approach to DEI is comprehensive, focusing on certain key issues, including disability inclusion.

We want everyone at Grant Detection to contribute and thrive to the best of their ability by working together to create a diverse and inclusive culture with structures that promote fair opportunities for success based on merit.

We strive to remove barriers to knowledge creation, discovery, and use to contribute to more equitable outcomes in education and science advancement.

We are committed to progress.

In 2025, we will take further steps to ensure that our recruitment processes follow best practice in terms of inclusivity and accessibility. We will continue to build opportunities that support employees with disabilities.

We value all our users and customers equally and create a product that meets their different needs and requirements.
